

TECHNOLOGY RESOURCES

Use
the library as a
resource center for
classes and PLC.
There is always
someone here to
help!

JIM GATES

He is a leader in educational technology and web 2.0 tools. Visit his wikispace for great resources and educational ideas:

<http://gatesworkshop.wikispaces.com/> Get his bookmarks at his delicious.com account: jgates513

SOME FAVORITE WEB 2.0 SITES:

1. Picnik (www.picnik.com) - allows you to edit photos online; has many Photoshop-like effects
2. Delicious (delicious.com) - a social bookmarking site; my account is *JasonHenry*; it's great for teachers who want to be able to access their bookmarks from home or school.
3. Animoto (www.animoto.com) - this is a good PhotoStory alternative for Mac users
4. Visuwords (www.visuwords.com) - online graphical dictionary; interesting spin on a traditional tool.
5. Google Tools (www.google.com) - use google docs, calendar, maps, etc. interactively with your students
6. Teacher Tube (teachertube.com) - post lessons you created or search

for video lessons other teachers created.

7. Surveys/Polls (polldaddy.com) - create surveys and polls for your website, blog and social network profiles
8. Convert File Types (zamzar.com, www.mediaconverter.org, or media-convert.com) These websites allow you to convert file types to be compatible with your software. - i.e. wmv to m4v video file
9. Timelines (xtimeline.com) - interactive online timelines.
10. Donate Rice (freerice.com) - Select a topic and the site will donate rice for every correct answer.
11. Internet Safety (www.netsmartz.org)- find material and activities on cybersafety.

Internet 2 helps video conferences
PHS has internet 2 capabilities which is a separate internet channel that will speed up video conferences. (More info. in Oct. Highlights)
